EDUCATION

Rensselaer Polytechnic Institute (RPI)

B.S. in Computer Science and Games and Simulation Arts and Sciences

Troy, NY

Expected May 2028

Relevant Coursework: Data Structures, Foundations of Computer Science, Computer Architecture and Operating Systems, Introduction to Algorithms, Principles of Software

TECHNICAL SKILLS

Languages: Python, Java, C#, SQL, DQL, C++, C, JavaScript, HTML/CSS, R, Lua

Tools and Platforms: pandas, Git, GitHub, Azure DevOps, Dynatrace, Colibra, Snowflake, SAP HANA, ServiceNow, Tableau, Unity, Roblox Studio, Microsoft Excel

EXPERIENCE

TD Securities

New York, NY

Technology Summer Analyst - Platform Engineering and Support

June 2026 - August 2026

- Developed a Python/pandas workflow that consolidated NAS master, session, and correlation data, mapped shares to users and support contacts, and generated review-ready ownership reports with less manual cleanup.
- Investigated privileged access management feed and load failures, coordinated with application and support teams to correct missing files and role/entitlement formatting, and supported successful reconciliation.
- Improved feed processing by implementing Python/pandas logic to select and process the correct file when multiple feed files were available.
- Used Dynatrace DQL queries and notebooks to analyze Veritas log ingestion and monitoring coverage, identifying a host with 1,000+ log sources that were not being ingested and additional alerting gaps.
- Submitted an ID8 innovation proposal for application-specific alert threshold management to reduce alert fatigue observed during periods with 700+ active problems.

Siemens Financial Services

Iselin, NJ

IT Solution Expertise PS/EQ and Functions Summer Intern

May 2025 - August 2025

- Built exploratory data analyses and SQL/Python validation checks that strengthened data governance in Colibra and surfaced inconsistencies across systems and downstream consumers.
- Created Colibra data quality rules and a SharePoint knowledge site to improve issue visibility, documentation, and resolution workflows.
- Collaborated with mentors and cross-functional stakeholders to investigate data discrepancies and coordinate corrective actions across IT infrastructure projects.

IT Solution Expertise PS/EQ and Functions Summer Intern

June 2024 - July 2024

- Validated HANA-to-Snowflake data migration results by organizing datasets, testing parsing code, comparing transferred records, and troubleshooting incorrectly migrated data.
- Prepared data-flow documentation and presentation materials to communicate migration processes and findings to technical stakeholders.

SELECTED PROJECTS

Class-Based PvE Extraction Dungeon Crawler

Roblox Studio, Lua

- Architected modular multiplayer systems for class selection, server-authoritative combat, room progression, loot, extraction, and persistent stash management; implemented cursor-directed movement, enemy archetypes, hazards, and boss encounters.

2D Action Platformer

Unity, C#

- Built and deployed a three-level WebGL platformer with responsive movement, jumping and dashing, hazards, triggered platforms, persistent death tracking, sound effects, particles, and camera feedback.
