EDUCATION

Rensselaer Polytechnic Institute (RPI)

Bachelor of Science in Computer Science (CSCI) and Game Simulation Arts and Science (GSAS)

Troy, NY

Expected May 2028

RELEVANT COURSEWORK

Data Structures, Calculus 2, Multivariable Calculus, Foundations of Computer Science, Computer Architecture & OS, Intro to Algorithms, Principles of Software

SKILLS

Coding Languages: HTML, CSS, JavaScript, Java, Python, C++, C, C#, R, SQL, Luau

Software: Visual Studio Code, GitHub, Azure DevOps, Microsoft Office 365, Adobe Photoshop, Autodesk Maya, Dynatrace

Certifications: Knowledge-Based Workforce Competency Credential-NOCTI (Web Development and Web Design)

WORK / LEADERSHIP EXPERIENCE

TD Securities

New York, NY

Platform Engineering and Support Summer Analyst

June 2026 – August 2026

- Developed a Python/pandas workflow that consolidated NAS master, session, and correlation data, mapped shares to users and support contacts, and generated review-ready ownership reports with less manual cleanup
- Investigated privileged access management feed and load failures, coordinated with application and support teams to correct missing files and role/entitlement formatting, and supported successful reconciliation
- Improved feed processing by implementing Python/pandas logic to select and process the correct file when multiple feed files were available
- Used Dynatrace DQL queries and notebooks to analyze Veritas log ingestion and monitoring coverage, identifying a host with 1,000+ log sources that were not being ingested and additional alerting gaps
- Submitted an ID8 innovation proposal for application-specific alert threshold management to reduce alert fatigue observed during periods with 700+ active problems

Siemens Financial Services

Iselin, NJ

IT Solution Expertise PS/EQ & Functions Summer Intern

May 2025 – August 2025

- Built automation processes with EDAs and strengthened data governance in Collibra
- Wrote SQL queries and applied Python for data validation and exploratory analysis
- Collaborated with mentors and cross-functional teams on IT infrastructure projects
- Created a SharePoint site and Collibra quality rules to identify and resolve data inconsistencies
- Investigated data inconsistencies and coordinated fixes across systems and downstream consumers

IT Solution Expertise PS/EQ & Functions Summer Intern

June 2024 – July 2024

- Organized data sets and tested code to parse through the data sets
- Collaborated on transferring data from HANA to Snowflake
- Helped evaluate data transferred properly from HANA to Snowflake
- Assisted in troubleshooting technical users and fixing incorrectly transferred data
- Prepared data organization diagram for presentation

EXTRACURRICULARS

Web Design Pathway Program

Marlboro, NJ

Advisory Board Member

September 2022 – June 2024

- Selected amongst other students in the class to be a part of the board
- Spoke with teachers in the program across the district to improve the program
- Organized meetings between all involved grade levels and planned events to help foster a community
